In business and accounting, information technology controls (or IT controls) are specific activities performed by persons or systems designed to ensure that business objectives are met. They are a subset of an enterprise's internal control. IT control objectives relate to the confidentiality, integrity, and availability of data and the overall management of the IT function of the business ...

Accounting system can be interpreted as a part of cost management system of an

organization. Cost management is not cost reduction alone. It is much broader. Organization increase advertising expenditure to increase sales, increase research and development expenditures to promote new products. Here the concerned managers are deliberately incurring additional costs in a period (compared to the ...
