In network topology, we study the properties relating to the placement of elements in the network and the geometric configuration of the network. It's all about circuit elements such as branches, nodes, and loops. Branches // A branch represents a single element such as a voltage source or a resistor.

Self-assembly of two-dimensional graphene sheets is an important strategy for producing macroscopic graphene architectures for practical applications, such as thin films and layered paperlike materials. However, construction of graphene self-assembled macrostructures with three-dimensional networks has never been realized. In this paper, we prepared a self-assembled graphene hydrogel (SGH) via ...
