Introduction to Flame Arrestor. by TheProcessPiping · Published July 2, 2018 · Updated July 5, 2018. A Flame Arrestor is a device fitted to the opening of an enclosure or to the connecting pipe work in a system of enclosures and which allows gases, liquids, etc. to pass through it but prevents the transmission of a flame in order to prevent a larger fire or explosion. In process operations ...

When a solution containing calcium and sulfate ions dries, the ions crystallize as $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$, which is gypsum. Gypsum is soluble in water, so it is washed away from areas that receive a heavy flow of rain. However, gypsum accumulates in the same sheltered areas that are protected from erosion, and attracts dust, carbon particles, dry-ash, and other dark pollutants. This results in ...

The eSync Tool from HealTech Electronics Ltd. is the best solution for this job. With conventional sync tools you only see a heavily damped average value of the pulsing vacuum. In contrast, with the eSync Tool you get real-time information about what is happening in the combustion chamber. You can also make far more precise adjustments. Measurements can be saved and used for reference later ...
